High-brightness performance. Light-weight design.

There is no other 1DLP® laser projector with a better lumen-to-weight ratio. Achieving 20,000 lumens and weighing less than 95 lbs., the Christie® D20WU-HS and D20HD-HS are the lightest and brightest 1DLP laser projectors on the market. This powerhouse performance provides a viable alternative to similarly bright 3DLP projectors.

Not only are they bright, they produce amazing, true-to-life visuals thanks to the enhanced color accuracy of Christie's patented BoldColor Technology and HD or WUXGA resolution.

With built-in Christie Twist™, users have the tools needed to quickly and easily set up and align irregular screens and multi-projector displays.

These projectors come with the option to add Christie Mystique™ automated camera-based alignment software, letting you quickly stage, install, align, and recalibrate multi-projection systems in minutes.
